PROFILE

Multimedia Content Creator and Digital Artist with 3 years of experience producing dynamic video content, motion graphics, and comprehensive visual media. Skilled in managing the complete creative pipeline—from conceptualizing, storyboarding, and spatial layout to advanced video sequencing and post-production. Leverages structured project methodologies to ensure the reliable delivery of continuously enhanced digital campaigns and creative assets. Complements this deep multimedia expertise with capabilities in UI/UX interface design and native frontend web development to craft cohesive, user-friendly digital experiences.

TECHNICAL SKILLS

- **Multimedia Production & Strategy:** Video Editing, Motion Graphics & Expressions, Conceptualizing, Storyboarding, Asset Library Management, Visual Sequencing, Sound & Video Design.
- **Graphic Design & Artistry:** Digital Branding Systems, Visual Hierarchy, Spatial Layout Design, Vector Graphics, Image Composition, Typography, 3D Asset Modeling.
- **Design Architecture:** Interface Design, Information Architecture, Design System, Charts (ERD, DFD, Flowcharts).
- **Frontend Web Development:** Native HTML5, CSS3, Vanilla JavaScript, Learner-Friendly Interfaces, Web Optimization.
- **Workflow & Tools:** Git/GitHub (Branch-per-Feature Workflow), System Development Life Cycle (SDLC), Jira, Notion, Figma, Adobe After Effects, Photoshop, Illustrator, Blender, Canva, CapCut.

EXPERIENCE

Multimedia Officer & Head Creative Editor | SPCC CIT Council

August 2022 – 2025

- Led end-to-end content creation workflows—from conceptualizing and storyboarding to editing, formatting, and final delivery—ensuring consistency across CIT department materials.
- Developed and produced instructor-led materials, instructional videos, and visual presentations for major institutional events.
- Maintained course materials in a structured and version-controlled manner, organizing content libraries for reuse across campaigns.

Freelance UI/UX Designer & Content Developer | Independent

2024 – Present

- Designed and produced client-facing digital products, including structured documentation, job aids, and user-facing guides for real-world performance use cases.
- Collaborated cross-functionally with subject matter experts to clarify technical details and translate requirements into clean, formatted, and learner-friendly interface designs.
- Managed iterative project lifecycles using SDLC methodologies, ensuring a structured delivery approach for final technical documentation.
- Continuously enhanced structured design templates and branding standards across multiple projects, ensuring visual and formatting consistency.

PROJECTS

AVONIC: Sensor-Integrated Automated Vermicomposting System | Capstone Project

- Designed and engineered the real-time monitoring dashboard UI for a specialized African Night Crawler vermicomposting system, utilizing native web technologies for optimized performance.
- Translated complex live sensor feeds and IoT data into a structured, easy-to-navigate interface with intuitive controls for non-technical end users.

SPCC Kalookan Inc. - Official Website Redesign | Institutional Project

- Led the UI/UX redesign and frontend development of an institutional web platform focusing exclusively on the Basic Education and College academic tiers.
- Planned and developed the "SPCC Bugle," integrating a fully functional, newspaper-style digital news section into the modernized school website ecosystem.

EDUCATION

Systems Plus Computer College (SPCC) Kalookan Inc. | Bachelor of Science in Information Technology (BSIT)

2022 – 2026

- **Honors & Awards:** Magna Cum Laude, Exemplary Leadership (3 Years of Service), Subject Excellence - Technopreneurship, Infomercial Champion - SPCC, Most Notable Presentation - Arduino Expo, Mentor Leader Award.
